## Redemption Retrieval Authorization

---

This form is used to authorize DomainDiscover to retrieve your recently deleted domain(s) from the registry during the redemption period. This means that the domain will be renewed for an additional year from the expiration date. Domain ownership and all contact information will remain the same as they were prior to domain deletion. Only the owner of the domain at the time of deletion can request this action. Once the domain retrieval has been completed, you may login to your account control panel and update any contact information.

Retrieval requests must be submitted while the domain is in "Redemption" status. Once a domain enters the "pendingdelete" status, it can not be retrieved. Please allow 2 business days after your request is received for it to be processed.
